Assembly guide

When you place your FT Wall Mount, keep in mind that If you attach the computer in the top of the bracket it will correspond to the center of your FT Touch Computer, when in stalling like the example shown in this brochure.

(The 8 bolts shown on the picture are not included)

The second step is to assemble the keyboard arm onto the FT wall mount with 4 pcs. M8X20 A4 Bolts. The Bolts should be assembled as shown in the image below for best results.

The third step is to assemble the Basic bracket onto the FT wall mount with 4 pcs. of M8X20 A4 Bolts.

(In this step you can adjust the viewing angle horizontally and vertically as you wish)

The fourth step is to assemble the Basic bracket onto the FT Touch Computer with 2 pcs. of M8X20 A4 Bolts. The Bolts should be assembled as shown in the image below for best results.

Your terminal is now installed on the FT Wall Mount with keyboard arm, in your preferred position. The fifth step is to assemble the locknuts onto the bolts for extra safety.

The sixth and final step is to connect the cables, so your FT Touch Computer can assist you in the daily production.

Foodteq
A PART OF TECHON7 GROUP

Technical solutions for your needs right now - and in the future

Let us improve and empower your future production

With Foodteq you will get a partner who, specializes in creating robust computer solutions tailored for demanding work environments like the food industry. We combine exceptional industrial components to craft computers with impressive performance and extended lifespan. These solutions can be applied across various areas including productionlines, data monitoring, artificial intelligence, and process control. Whether it's optimizing production or enhancing control processes, our products are designed to deliver reliable performance. Whether the cooperation will be on a big scale or a small scale.

Foodteq can adapt to your needs all over the world.

Demand — **Idea** — **Development** — **Test** — **Production** — **Distribution**
